Important Disclosures

Investors should carefully consider the investment objectives, risks, charges and expenses of the CRM Funds carefully before investing. To request a prospectus with this and other information about the Funds, please call 800.276.2883 or visit www.crmfunds.com. It should be read carefully before investing.

The Funds are subject to risks, which are described in the prospectus. In particular, when compared to mutual funds that focus on larger capitalization companies, shares of the Funds generally are more volatile because of the exposure to smaller and mid capitalization companies, which may have more limited product lines and fewer capital resources. Value-based investments are subject to the risk that the broad market may not recognize their intrinsic values.

¹The benchmark referenced is as follows: Russell 2000 Value Index. The Russell 2000 Value Index measures the performance of those companies in the Russell 2000 Index with lower price-to-book ratios and lower forecasted growth values. It is not possible to invest directly in an index.

² Expense Ratio Disclosure

The expense ratio is the fund's annualized expense ratio as stated in the current prospectus. This ratio reflects the fund's actual expenses for the fiscal year ending prior to the date of the current prospectus.

Fund Characteristics. Information pertaining to Fund Characteristics includes weighted average market capitalization, median market capitalization and other preliminary numbers that have been derived from Refinitiv. As these numbers are preliminary, they are subject to change. These figures refer to the fund's portfolio and not to the fund itself.

P/E FY2 of a stock is calculated by dividing the current price by the projected earnings for the company's fiscal year after next.

Wtd Avg Mkt Cap (Weighted Average Market Cap) is weighted by the market capitalization of each stock in the index.

Wtd Median Mkt Cap (Weighted Median Market Cap) is the weighted market capitalization midpoint in the index weighted.

Active Share is a measure of the percentage of the portfolio that differs from its benchmark on an average portfolio weightings basis.

³Past performance does not guarantee future results.
