

## **CRM Small/Mid Cap Value Fund**

**Investor Shares CRMAX**

**Institutional Shares CRIAX**

## **Summary Prospectus**

**March 1, 2026**

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at [www.crmfunds.com/funds-overview/shareholder-resources/documents](http://www.crmfunds.com/funds-overview/shareholder-resources/documents). You can also get this information at no cost by calling 800-CRM-2883 or by sending an email request to [prospectus@crmlc.com](mailto:prospectus@crmlc.com). The Fund's prospectus and statement of additional information, both dated March 1, 2026, and the independent registered public accounting firm's report and financial statements in the Fund's annual report to shareholders for the period July 1, 2025 through October 31, 2025, are incorporated by reference into this summary prospectus.

Like all mutual fund shares, these securities have not been approved or disapproved by the Securities and Exchange Commission nor has the Securities and Exchange Commission determined whether this prospectus is accurate or complete. Anyone who tells you otherwise is committing a crime.

## INVESTMENT OBJECTIVE

CRM Small/Mid Cap Value Fund seeks long-term capital appreciation.

## FEES AND EXPENSES

This table sets forth the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

### ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

	<b>Investor Shares</b>	<b>Institutional Shares</b>
Management Fees	0.75%	0.75%
Distribution (12b-1) Fees	None	None
Other Expenses		
Shareholder Servicing Fee	0.25%	None
Other Miscellaneous Expenses	<u>0.22%</u>	<u>0.27%</u>
Total Other Expenses	<u>0.47%</u>	<u>0.27%</u>
<b>Total Annual Fund Operating Expenses</b>	<u>1.22%</u>	<u>1.02%</u>

### EXAMPLE

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example below shows what you would pay if you invested \$10,000 over the various time periods indicated. The Example assumes that you reinvested all dividends and other distributions; the average annual return was 5%; the Fund's total operating expenses are charged and remain the same over the time periods; and you redeemed all of your investment at the end of each time period.

Although your actual costs may be higher or lower based on these assumptions, your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
Investor Shares	\$124	\$387	\$670	\$1,477
Institutional Shares	\$104	\$325	\$563	\$1,248

### PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. For the period July 1, 2025 through October 31, 2025, the Fund's portfolio turnover rate was 46% of the average value of its portfolio.

## PRINCIPAL INVESTMENT STRATEGIES

The Fund, under normal circumstances, invests at least 80% of its assets in equity and equity related securities of U.S. and non-U.S. companies with market capitalizations at the time of initial purchase within the range of those in the Russell 2500<sup>®</sup> Value Total Return Index or in the S&P MidCap 400<sup>®</sup> Value Total Return Index (together, “small/mid cap companies”) that are publicly traded on a U.S. securities market. The market capitalization ranges of the Indices change constantly. The capitalization ranges of small/mid cap companies in which the Fund will invest will change in line with the index market capitalization ranges on a quarterly basis. As of December 31, 2025, the market capitalization range of the Russell 2500<sup>®</sup> Value Total Return Index was approximately \$5.61 billion to \$37.12 billion, and the market capitalization range of the S&P MidCap 400<sup>®</sup> Value Total Return Index was approximately \$1.77 billion to \$21.30 billion. The Fund seeks to deliver similar risk characteristics to the Russell 2500<sup>®</sup> Value Total Return Index (the “Performance Benchmark”). For purposes of the 80% investment policy, equity and equity related securities include: common and preferred stocks, and warrants on common stock.

The Adviser evaluates investment opportunities for the Fund using a proprietary value-oriented process that seeks to identify companies characterized by three attributes: change, neglect and relative valuation. The Adviser seeks to identify those changes that are material to a company’s operations, outlook and prospects while also identifying companies that it believes have been neglected by other investors. The Adviser utilizes a primarily qualitative research process focused on these attributes to identify and invest in relatively undervalued companies. These factors formulate the Adviser’s investment case for each company under consideration for investment. The Adviser’s process is focused not only on building the investment case, but also on understanding how the case might deteriorate. The Adviser’s sell discipline is ultimately dependent upon the written investment case for the stock. A position generally will be sold when one or more of the following occurs: (i) an established price target is approaching or is attained, implying the stock has reached an estimation of fair valuation; (ii) a factor in the initial investment thesis has deteriorated causing the Adviser to reassess the potential for the company; or (iii) the Adviser identifies what it believes is a more promising investment opportunity. After a decision to sell is made, the investment generally is replaced by either a new idea or existing holdings which the Adviser believes offers greater upside.

## PRINCIPAL INVESTMENT RISKS

It is possible to lose money by investing in the Fund. There is no guarantee that the stock market or the stocks the Fund buys will increase in value. The following is a summary description of certain risks of investing in the Fund.

**Market Risk.** The market values of securities or other assets will fluctuate, sometimes sharply and unpredictably, due to factors such as economic events, governmental actions or intervention, actions taken by the U.S. Federal Reserve or foreign central banks, market disruptions caused by trade disputes, labor strikes or other factors, political developments, armed conflicts, economic sanctions and countermeasures in response to sanctions, major cybersecurity events, the global and domestic effects of widespread or local health, weather or climate events, and other factors that may or may not be related to the issuer of the security or other asset.

**Risks of Small and Mid Cap Companies.** Compared to mutual funds that focus exclusively on large capitalization companies, the Fund may be more volatile because it invests in small and/or mid capitalization companies. Small and mid capitalization companies are more likely to have more limited product lines, fewer capital resources and less depth of management than larger companies. Securities of smaller companies may have limited liquidity and may be difficult to value or to sell at an advantageous time or without a substantial drop in price.

**Company Risk.** The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the market as a whole. This may result from a wide variety of factors that affect particular companies or industries, including changes in market demand for particular goods and services, increases in costs of supply, changes in management, increased competition and changes in the regulatory environment.

**Value Investing Risk.** The value approach to investing involves the risk that stocks may remain undervalued for long periods, undervaluation may become more severe, or perceived undervaluation may actually represent intrinsic value. Value stocks may underperform the overall equity market for an extended period while the market favors growth stocks. A value stock may not increase in price as anticipated by the Adviser if other investors fail to recognize the company's value and bid up the price or the factors that the Adviser believes will increase the price of the security do not occur or do not have the anticipated effect. Value stocks may go in and out of favor over time and the Adviser may sell a security prior to the security realizing a gain in connection with changed market perception regarding the value of the security.

**Portfolio Selection Risk.** The value of your investment may decrease if the Adviser's judgment about the attractiveness, value of, or market trends affecting a particular security, industry, sector, country or region, or about market movements, is incorrect.

**Risks of Foreign Investments.** Investing in foreign securities involves special risks that can increase the potential for losses. These risks may include nationalization or expropriation of assets, illiquid foreign securities markets, confiscatory taxation, foreign withholding taxes, imposition of currency controls or restrictions, natural disasters, terrorism and political, economic or social instability. Because many foreign markets are smaller, less liquid and more volatile, the Fund may not be able to sell portfolio securities at times, in amounts and at prices it considers reasonable. In some foreign countries, less information is available about issuers and markets. Foreign markets may offer less protection to investors. Foreign stocks can fluctuate more widely in price than comparable U.S. stocks, and they may also be less liquid. Currency fluctuations could erase investment gains or add to investment losses.

**Focus Risk.** To the extent that the Fund invests in a smaller number of issuers or emphasizes investments in particular industries or market sectors, the Fund will be more sensitive to any market price movements, regulatory or technological changes, economic conditions or other developments affecting those issuers or companies in those industries or market sectors.

**Portfolio Turnover Risk.** If the Fund trades portfolio securities in high volumes, it may incur additional operating expenses, which would reduce performance, and could cause shareholders to incur a higher level of taxable costs, as well as income or capital gains.

**Cybersecurity Risk.** Cybersecurity incidents, both intentional and unintentional, may allow an unauthorized party to gain access to Fund assets, Fund or customer data (including private shareholder information), or proprietary information, cause the Fund, the Adviser and/or their service providers (including, but not limited to, the Fund's transfer agent, distributor, custodian, fund accounting agent and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality, or prevent fund investors from purchasing, redeeming or exchanging shares, receiving distributions or receiving timely information regarding the Fund or their investment in the Fund. Cybersecurity incidents may result in financial losses to the Fund and its shareholders, and substantial costs may be incurred in order to prevent or mitigate any future cybersecurity incidents.

**Changes in Trade Negotiations Risk.** In recent years, the U.S. government has indicated its intent to alter its approach to international trade policy and in some cases to renegotiate, or potentially terminate, certain existing bilateral or multi-lateral trade agreements and treaties with foreign countries, and has made proposals and taken actions related thereto. Tariffs on imported goods could further increase costs, decrease margins, reduce the competitiveness of products and services offered by current and future portfolio companies and adversely affect the revenues and profitability of portfolio companies whose businesses rely on goods imported from such impacted jurisdictions.

**Highly Volatile Markets Risk.** The prices of instruments in which the Fund may invest are influenced by numerous factors, including interest rates, currency rates, default rates, governmental policies and political and economic events (both domestic and global). Moreover, political or economic crises, or other events may occur that can be highly disruptive to the markets in which the Fund may invest. In addition, governments from time to time intervene (directly and by regulation), which intervention may adversely affect the performance of the Fund and its investment activities. The Fund is also subject to the risk of a temporary or permanent failure of the exchanges and other markets on which its investments may trade. Sustained market turmoil and periods of heightened market volatility make it more difficult to produce positive trading results, and there can be no assurance that the Fund's strategies will be successful in such markets.

**Legislation and Regulatory Risk.** New or amended regulations may be imposed by the Commodity Futures Trading Commission (the "CFTC"), the SEC, the Federal Reserve, the European Union (the "EU") or other financial regulators, other governmental or intergovernmental regulatory authorities or self-regulatory organizations that supervise the financial markets, and could adversely affect the Fund. In particular, the CFTC and the SEC are empowered to promulgate a variety of new rules pursuant to recently enacted financial reform legislation in the United States. The Fund also may be adversely affected by changes in the enforcement or interpretation of statutes and rules by these regulatory authorities or self-regulatory organizations.

**Market Disruptions Risk.** The Fund may incur major losses in the event of market disruptions and other extraordinary events in which historical pricing relationships become materially distorted. The risk of loss from pricing distortions is compounded by the fact that in disrupted markets many positions become illiquid, making it difficult or impossible to close out positions against which the markets are moving. Market disruptions caused by unexpected political, military and terrorist events may from time to time cause dramatic losses for the Fund and such events can result in otherwise historically low-risk strategies performing with unprecedented volatility and risk.

**U.S. Debt Ceiling and Budget Deficit Risks.** U.S. debt ceiling and budget deficit concerns have increased the possibility of additional credit-rating downgrades and economic slowdowns, or a recession in the United States. Although U.S. lawmakers have historically passed legislation to raise the federal debt ceiling on multiple occasions, ratings agencies have lowered or threatened to lower the long-term sovereign credit rating on the United States. In August 2023, Fitch Ratings Inc., downgraded the U.S. credit rating to AA+ from AAA, citing fiscal deterioration over the next three years and close encounters with default due to ongoing political dysfunction. The impact of a U.S. default on its obligations or any further downgrades to the U.S. government’s sovereign credit rating or its perceived creditworthiness could adversely affect the U.S. and global financial markets and economic conditions. In addition, disagreement over the federal budget has caused the U.S. federal government to shut down for periods of time. Continued adverse political and economic conditions could have a material adverse effect on the Fund’s business, financial condition and results of operations.

**Expense Risk.** Your actual costs of investing in the Fund may be higher than the expenses shown in “Annual Fund Operating Expenses” for a variety of reasons. For example, expense ratios may be higher than those shown if overall net assets decrease. Net assets are more likely to decrease and Fund expense ratios are more likely to increase when markets are volatile.

These and other risks are discussed in more detail later in this prospectus or in the statement of additional information.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

## PERFORMANCE INFORMATION

The bar chart and the average annual total return table below illustrate the risks and volatility of an investment in the Fund. The bar chart shows changes in the Fund’s performance from calendar year to calendar year for Institutional Shares. The table shows how the Fund’s average annual total returns for one, five and ten years, both before and after taxes, compared with those of a broad-based securities market index and an additional index that has characteristics relevant to the Fund’s investment strategies. The Russell 3000® Total Return Index (the “Regulatory Benchmark”) is a broad-based measure of overall market performance used as a benchmark only for regulatory purposes. The Performance Benchmark is an index that has characteristics relevant to the Fund’s investment strategies. Total returns would have been lower had certain fees and expenses not been waived. The Fund makes updated performance information available at the Fund’s website, [www.crmfunds.com/funds-overview/performance](http://www.crmfunds.com/funds-overview/performance), or at the following telephone number: 800-CRM-2883. The Fund’s past performance, both before and after taxes, does not necessarily indicate how the Fund will perform in the future.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns will depend on your tax situation, may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In that case, you may be taxed when you take a distribution from such plan, depending on the type of plan, the circumstances of your distribution and other factors. After-tax returns are shown only for Institutional Shares. After-tax returns for Investor Shares will vary. Returns after taxes on distributions and sale of shares are higher than returns before taxes for certain periods shown because they reflect the tax benefit of capital losses realized on the redemption of shares.

## INVESTMENT ADVISER

Cramer Rosenthal McGlynn, LLC.

## PORTFOLIO MANAGERS

Mimi Morris and Jeffrey Yanover jointly lead the team that is responsible for the day-to-day management of the Fund. Ms. Morris has served as a portfolio manager of the Fund since 2023. Mr. Yanover has served as a portfolio manager of the Fund since 2024.

## PURCHASE AND SALE OF FUND SHARES

You may purchase or redeem shares of the Fund each day the New York Stock Exchange is open at the Fund's NAV next determined after receipt of your request in good order.

The minimum initial investment in the Fund is \$2,500 (\$1,000 for individual retirement accounts or automatic investment plans) for Investor Shares and \$1,000,000 for Institutional Shares. The minimum additional investment for direct investors in the Fund's Investor Shares is \$50. Your financial intermediary may impose higher investment minimums. There is no minimum amount for additional investments in Institutional Shares.

You may purchase or redeem Fund shares by contacting your financial intermediary or, if you hold your shares directly with the Fund, by contacting the Fund's transfer agent, Ultimus Fund Solutions, LLC.

## TAX INFORMATION

The Fund's distributions are generally taxable as ordinary income, qualified dividend income, or capital gains, and it is generally a taxable event for you if you redeem, sell or exchange Fund shares, except when your investment in the Fund is made through an individual retirement account, 401(k) or other tax-advantaged account. In that case, you may be taxed when you take a distribution from such plan, depending on the type of plan, the circumstances of your distribution and other factors.

## PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
